

WalkStrong™ Powered by Symphonie Aqua System Digital

The Solution for Digital Scan to Zero-Ply Fit

Educational & Networking Event

Where: PVA Headquarters, 6 Corporate Drive, Halfmoon, NY 12065

When: October 28, 2021, 10 AM–4 PM followed by an offsite networking event

Cost: FREE

LEARN

Register today to meet the inventors and see how digital solutions are transforming prosthetic patient care. Earn four CECs from the American Board for Certification.

EXPERIENCE

Tour PVA's brand new, state-of-the-art manufacturing facility. Watch live demonstrations of the Symphonie Aqua System Digital and Predictive systems to see how they provide the digital weight-bearing scan used by PVA Med Rapid Plaster® and Emergence PRO™ 3D printers to create the strongest design. Watch how these scans are sliced to automatically fabricate the best 3D printed check socket available.

NETWORK

Be the first to experience this solution while networking with forward-thinking industry leaders.

ACQUIRE SHAPE

Symphonie Aqua Digital

- ✓ No additional materials (i.e. plaster of Paris)
- ✓ Cost, time, and material savings
- ✓ Reproducibility of the impression
- ✓ Simple application

DESIGN & PRINT SOCKET

Rapid Plaster WalkStrong™ Socket

- ✓ Reinforced design templates
- ✓ Certified slicing profiles optimized for ClearFit™ and Emergence PRO™ 3D Printer
- ✓ Designed for outstanding strength and clarity for dynamic fittings

ANTICIPATE NEEDS

Symphonie Aqua Predictive

- ✓ Time, material, and cost savings
- ✓ Acting with foresight instead of reacting to any complications that may arise
- ✓ Scientifically sound, developed with medical professionals

Eat, Drink, and Network in a Relaxed Environment

Lunch and refreshments are included.

Transportation will be provided for the offsite networking event at Thendara Farms.
